# Warehouse & Forwarding

As sister Company of Terneuzen Port Service, Terneuzen Marine Supplies (TMS) takes care of spares handling.

We take care of logistics and custom handling and deliver them on board.

A secure warehouse with a capacity of approx 800sqm has been established for this purpose. A collaboration has been established with Rhenus Air & Ocean for air freight handling and with customs office Verex for customs formalities.

For questions please do not hesitate to contact us:

Rhenus A&O is our partner in this matter.

## **SOLVENT-FREE EPOXY-BASED FILLER, ADHESIVE SEALANT AND COATING COMPOUND**

For 40 years, Ivegor MP has been, and still is, a valuable and reliable aid when carrying out repairs and maintenance and solving problems. It is used in industry, on ships, for installation work and in construction, but you can also use it for repairs in your home.

Ivegor MP is an interesting product due to its wide range of possible applications; it can be used on or between almost any kind of material, such as iron, light metals, wood, PVC, glass, etc. Rather exceptional is its applicability in both fresh and saltwater. Ivegor MP is the ideal replacement for many similar products that are often only usable on one kind of material.

**ROOFERS**

**SHIP-REPAIRERS**

**DIVERS**

**CONTRACTORS**

**FISHERMEN**

**GARAGES**

**PLUMBERS & FITTERS**

**DREDGING & MARINE  
CONTRATORS**

**SALVAGERS**

Ivegor MP is characterized by an excellent level of fixation and resistance. It is not affected by solvents, fats, and corrosive substances. The product is extremely easy to prepare and apply.

Together, the yellow and blue components form a green substance. This makes it easy to check whether Ivegor MP is ready for application. After hardening, it can be sanded and painted.

## Ivegor MP can be used to repair

- Leakages in ships and yachts
- Splits and cracks in pipes and sanitary fittings
- Leakages in swimming pools; cellars and foundations
- Cracked engine blocks
- Broken exhaust pipes (Ivegor MP is heat-resistant up to about 200°C).
- Damaged concrete structures
- Leakages in fuel and chemical product tanks and pipes
- Coating of pipes and steel structures
- Repairing gutters
- Sealing couplings
